PE15A4003 is a 2W coaxial wideband power amplifier operating in the 2 to 6 GHz frequency range. The amplifier offers 33 dBm min of P1db and 30 dB min small signal gain with the excellent gain flatness of ±1.0 dB max and the output IP3 performance of 39 dBm. This performance is achieved through the use of hybrid MIC design and advanced GaAs PHEMT devices. The amplifier requires typically a +12V DC power supply. The connectorized SMA module is unconditionally stable and includes built-in voltage regulation, bias sequencing, and reverse bias protection for added reliability. The amplifier operates over the temperature range of -55°C and +85°C.
