2 Way SMA Wilkinson Power Divider From 1 GHz to 2 GHz Rated at 10 Watts

Features
- 2-Way Power Divider
- Wilkinson Design
- 1 to 2 GHz Frequency Range
- Max Power 10 Watts (CW)
- Insertion Loss < 3.3 dB
- Isolation > 22 dB

Applications
- Test and Measurement
- Military Communications
- Commercial Communications
- Wireless Communications
- SATCOM

Description
Pasternack carries a wide selection of power dividers to fit your needs. These components are essential in many systems, allowing the combination of multiple signals or splitting of a single signal into multiple signals with equal magnitude and phase. Pasternack's resistive and Wilkinson power dividers come with excellent performance featuring minimal loss, high isolation and low VSWR. They are available in both narrow and broad bandwidths with a variety of connector types such as 2.92mm, BNC, N and SMA.

The PE2011 is a 2-way Wilkinson power divider that operates from 1 to 2 GHz and can handle up to 10 Watts (CW) with 3.3 dB max insertion loss and 22 dB min isolation. The package interface uses SMA female connectors and is REACH and RoHS compliant.

Electrical Specifications
- Design: Wilkinson
- Number of Output Ports: 2

The information contained in this document is accurate to the best of our knowledge and representative of the part described herein. It may be necessary to make modifications to the part and/or the documentation of the part, in order to implement improvements. Pasternack reserves the right to make such changes as required. Unless otherwise stated, all specifications are nominal. Pasternack does not make any representation or warranty regarding the suitability of the part described herein for any particular purpose, and Pasternack does not assume any liability arising out of the use of any part or documentation.
