## Description

Pasternack carries a wide selection of power dividers to fit your needs. These components are essential in many systems, allowing the combination of multiple signals or splitting of a single signal into multiple signals with equal magnitude and phase. Pasternack's resistive and Wilkinson power dividers come with excellent performance featuring minimal loss, high isolation and low VSWR. They are available in both narrow and broad bandwidths with a variety of connector types such as 2.92 mm , BNC, N and SMA.

The PE20DV1059 is a 2-way high power Wilkinson power divider that operates from 1 to 40 GHz and can handle up to 20 Watts (CW) with 2.2 dB max insertion loss and 15 dB min isolation. The package interface uses 2.92 mm female connectors and is REACH and RoHS compliant.
