**Configuration**

- Connector 1: SMA Male
- Connector 2: SMA Male
- Cable Type: PE-SR402FL

**Features**

- Anti-Torque SMA Connectors
- Dimensionally and electrically the same as standard, solid outer conductor semi-rigid coax
- Cable may be formed by hand and does not require special tools to bend
- May be formed more than once without damaging the outer conductor
- High RF Shielding >100 dB
- 100% Hi-Pot and Continuity Tested
- 100% VSWR tested to max frequency of assembly
- Standard and custom lengths ship the same day

**Applications**

- General Purpose
- Laboratory Use

**Description**

Pasternack’s formable cable assemblies are hand formable semi-rigid replacements that are an alternative to costly preformed assemblies. The formable semi-rigid cable alternatives are dimensionally and electrically similar to their semi-rigid counterpart and have a tinned copper braid outer shield that provides excellent RF shielding. The hand formable cable assemblies from Pasternack do not require special tooling to shape or reshape the assemblies and can replace standard semi-rigid versions. The assemblies are available with or without a FEP jacket and are RoHS compliant.
