Description

High-performance fiber optic cable assemblies like the PE3FCA405-25M from Pasternack are essential for efficient and reliable network infrastructures and part of a large selection of same day ship cable assemblies. Whether you need distribution assemblies for large-scale enterprise networks, fiber optic breakout assemblies for seamless connectivity, or fiber optic patch cord assemblies for precision connections, our solutions are engineered for durability and performance. Designed for various applications, including data centers, telecommunications, and industrial environments, our fiber optic distribution breakout assemblies ensure optimal signal integrity and minimal loss, making them the preferred choice for high-speed data transmission.

Our fiber optic distribution cables, including the Pasternack PE3FCA405-25M OM1 indoor fiber optic breakout assembly, cater to various bandwidth and distance requirements. Built with tight buffered aramid yarn construction, this 12-fiber multimode breakout assembly features LC UPC to ST UPC connectors and a Low Smoke Zero Halogen (LSZH) rated jacket for fire safety. The 6.2mm overall cable diameter, 2.0mm breakout diameter, and 62mm (10D) minimum bend radius ensure flexibility for indoor installations. Whether for data centers, structured cabling, or conduit routing, this assembly is designed to meet stringent industry standards.

The Pasternack PE3FCA405-25M OM1 fiber optic cable assembly provides 100Mb Ethernet support and 10Gb Ethernet up to 33 meters with a 62.5/125µm core size and an LED light source. With an operating temperature range of -20°C to 70°C, this assembly is ideal for confined installations where flame resistance is required. Engineered for low attenuation and high durability, the tight buffered fiber with aramid yarn reinforcement ensures exceptional performance in demanding network environments.
