MMBX Jack Snap-On Connector Solder Attachment Surface Mount PCB, With Female Center Contact

RF Connectors Technical Data Sheet

PE45262TR1

Configuration

- Snap-On MMBX Jack Connector
- 50 Ohms
- Straight Body Geometry
- Surface Mount Interface Type
- Solder Attachment

Features

- Max. Operating Frequency 12.4 GHz
- Excellent VSWR of 1.06:1
- Gold Plated Brass Contact
- Blind Mate Connection
- Small circuit footprint for high density applications
- packaging available for pick and place circuit board manufacturing
- Mechanical misalignment tolerance of 4.5deg/0.7mm Max

Applications

- General Purpose Test
- PCB Applications
- Circuit board test point
- PCB applications
- Low cost blind mate interconnect
- Board to board applications requiring multiple coaxial connections

Description

Pasternack’s PE45262TR1 MMBX jack snap-on connector with solder attachment for surface mount PCB is part of our full line of RF components available for same-day shipping. Our MMBX jack connector operates up to a maximum frequency of 12.4 GHz and offers excellent VSWR of 1.06:1.

Our MMBX jack connector PE45262TR1 datasheet specifications and drawing with dimensions are shown below in this PDF. Pasternack’s broad catalog of RF, microwave and millimeter wave connectors allows designers to configure and customize their signal connections however they like. Whether the need is to provide an I/O for a board design, or simply create a custom cable assembly configuration, Pasternack has the right connector for the job. Pasternack can also expertly build your custom cable assemblies for you and ship same-day.

Typical Performance Data

SOLDER PROCEDURE FOR MMBX RECEPTACLE

1) Deposit solder paste ‘SnAg4Cu0.5’ on mounting zone by screen printing application. We recommend a low residue flux. We advise a thickness of 150µm.

2) Placement of the receptacle on the mounting zone with an automatic machine of ‘pick and place’ type. A video camera is recommended for positioning of the component. Adhesive agents must not be used on the receptacle.

3) This process of soldering has been tested with convection oven. Below please find, the typical profile to use.

4) Verification of solder joints and position of the component by visual inspection.
