

TNC Male Shorting Dust Cap

Shorts and Caps Technical Data Sheet

PE6133

Features

- Protects against dust and contaminants
- Protects against physical damage
- Nickel Plated Body
- Internally Shorted

Applications

- General Purpose Laboratory Use
- Test and Measurement
- ESD Protection

Description

Pasternack's PE6133 connector dust cap has a TNC interface and a male gender. Our TNC male dust cap is a shorting design with a nickel plated body to ensure durability. The Pasternack shorting TNC connector cap is part of over 40,000 RF, microwave and millimeter wave products that ship the same day.

RF connector dust caps are essential for precision connectors, protecting them from dust, corrosion and potential damage especially to test and measurement equipment. Specific RF connector cap models come with a chain to prevent loss or misplacement. Internal short connector cap versions are available to protect equipment from a spike in current caused by electrostatic discharge (ESD).
