

Commercial Grade RP-TNC Plug to N Female Adapter

PE910052

Configuration

- TNC Plug Reverse Polarity Connector 1
- N Female Connector 2
- 50 Ohms Impedance
- Commercial Grade Design
- Straight Body Geometry

Features

- Gold Plated Brass Contact

Applications

- Allows Connection Between Series
- General Purpose Test

Description

Pasternack's PE910052 RP TNC plug to type N female adapter is part of our full line of RF components available for same-day shipping. Our reverse polarity TNC to type N adapter has a plug to female gender configuration in a commercial grade design. PE910052 reverse polarity TNC plug to type N female adapter operates to 11 GHz.

RF adapters are often used to enable connections between two connector types that would otherwise not mate. Certain adapter configurations can also be used to protect connectors on expensive equipment where the number of connect/disconnect cycles is high. An RF, microwave or millimeter wave adapter is connected to the equipment, and the commonly changed connection is made with the adapter which can be easily replaced when it wears out after high usage; such adapters are referred to as connector savers. Pasternack also offers bulkhead, panel mount, hermetically sealed, reverse polarity, and isolated ground adapter varieties to serve all of your RF, microwave and millimeter wave needs.
