N Female to UHF Female Adapter

RF Adapters Technical Data Sheet

Configuration
• N Female Connector 1
• UHF Female Connector 2
• 50 Ohms
• Straight Body Geometry

Features
• Typical VSWR of 1.3:1 up to 1,000 MHz
• Gold Plated Brass Contact

Applications
• Allows Connection Between Series
• General Purpose Test

Description
Pasternack’s PE9385 type N female to UHF female adapter is part of our full line of RF components available for same-day shipping. Our type N to UHF adapter has a female to female gender configuration. PE9385 type N female to UHF female adapter operates to 1,000 MHz.

RF adapters are often used to enable connections between two connector types that would otherwise not mate. Certain adapter configurations can also be used to protect connectors on expensive equipment where the number of connect/disconnect cycles is high. An RF, microwave or millimeter wave adapter is connected to the equipment, and the commonly changed connection is made with the adapter which can be easily replaced when it wears out after high usage; such adapters are referred to as connector savers. Pasternack also offers bulkhead, panel mount, hermetically sealed, reverse polarity, and isolated ground adapter varieties to serve all of your RF, microwave and millimeter wave needs.
