Precision N Male to BNC Female Adapter

RF Adapters Technical Data Sheet

PE9491

Configuration

• N Male Connector 1
• BNC Female Connector 2
• 50 Ohms

• Precision Design
• Straight Body Geometry

Features

• Max VSWR of 1.2:1 up to 8 GHz
• N Interface compliant with MIL-STD-348

• BNC Interface compliant with MIL-STD-348
• Gold Plated Beryllium Copper Contact

Applications

• Allows Connection Between Series
• General Purpose Test
• Precision Test & Measurement

Description

Pasternack’s PE9491 precision type N male to BNC female adapter is part of our full line of RF components available for same-day shipping. Our type N to BNC adapter has a male to female gender configuration in a precision design. PE9491 type N male to BNC female adapter operates to 8 GHz. The Pasternack RF adapter provides excellent VSWR of 1.2:1 maximum.

RF adapters are often used to enable connections between two connector types that would otherwise not mate. Certain adapter configurations can also be used to protect connectors on expensive equipment where the number of connect/ disconnect cycles is high. An RF, microwave or millimeter wave adapter is connected to the equipment, and the commonly changed connection is made with the adapter which can be easily replaced when it wears out after high usage; such adapters are referred to as connector savers. Pasternack also offers bulkhead, panel mount, hermetically sealed, reverse polarity, and isolated ground adapter varieties to serve all of your RF, microwave and millimeter wave needs.
