

# WR-10 Waveguide Magic Tee, UG-387/U-Mod Round Cover Flange Operating from 75 GHz to 110 GHz

## Waveguide Magic Tees Technical Data Sheet

PEWMT1000

### Features

- 75 to 110 GHz Frequency Range
- E to H Port Isolation 25 dB Min
- Collinear Port Isolation 15 dB Min
- 1 dB Insertion loss
- W Band

### Applications

- Test and Measurement
- Military Communications
- Commercial Communications
- Wireless Communications
- SATCOM

### Description

Pasternack's PEWMT1000 is a magic, or hybrid tee that operates from 75 GHz to 110 GHz, W band. It is a 4 port device that is internally tuned to optimize matching, balance, and isolation. Magic tees have an H-plane (sum) port, an E-plane (difference) port, and two collinear ports. A signal applied to the H port will be equally divided between the two collinear ports. A signal applied to the E port will be divided between the two collinear ports but with a 180 degree phase difference. Similarly, when two in-phase signals of equal amplitude are applied to the collinear ports, these will be added together at the H-plane (sum) port and subtracted from one another at the E-plane (difference) port.

### Electrical Specifications

Description	Minimum	Typical	Maximum	Units
Frequency Range	75		110	GHz
Insertion Loss			1	dB
Isolation, E-H (Difference-Sum) Ports	25			dB
Isolation, Collinear Ports	15			dB

### Mechanical Specifications

#### Size

Weight	0.125 lbs [56.7 g]
Waveguide Size	WR-10
Flange Type	Round Cover
Flange Designation	UG-387/U-Mod
Body Material and Plating	Aluminum, Gold
Body Plating Specification	ASTMB488

### Environmental Specifications

**Compliance Certifications** (see [product page](#) for current document)

### Plotted and Other Data
