#### Description

Pasternack's PE5SC3018 7mm sexless precision short circuit is part of our full line of RF components available for same-day shipping. This 7mm, precision short circuit is suitable for calibrating on most network and site analyzers. Calibration coefficients for this 7mm short circuit are included in the datasheet and can be keyed in to most VNAs to provide a replacement for your broken or misplaced component. The controlled impedance and electrical length of this component support calibrations through the entire frequency range of the precision connector interface.

Our 7mm sexless precision short circuit datasheet, specifications and drawing with dimensions are shown below in this PDF. Pasternack's broad catalog of RF, microwave and millimeter wave components allow designers to configure and customize their test solutions however they like. Whether the need is to provide precise SOLT / OSLT network analyzer calibrations or calibration kit replacement, Pasternack can ship you the right components same day.
