### Description

The Pasternack PEANRBD1037 antenna is an omni antenna operating from 860 MHz to 870 MHz with 1 dBi gain. Our high-quality rubber duck antenna transmits high power signals, increasing the signal strength, thus providing improved coverage, better broadcast control, and faster speed. The SMA male connector on this monopole antenna enables it to be used vertically or at any angle in between.

This PEANRBD1037 stubby antenna is 0.37 inches wide, 2.01 inches long, and 0.37 inches tall. Pasternack's omnidirectional antenna has a maximum input VSWR of 2:1, which results in the best power transfer and reduced losses. This omnidirectional antenna has a linear polarization, an SMA male connector, and an ABS radome material. Our black antenna functions between -40 to 65 degrees C and has 50 Ohm impedance.

The Pasternack antenna is ideal for public safety, security, construction, wireless communications, IOT sensors, IOT trackers, wireless microphones, industrial monitoring and data transmission, remote control, and amateur radio. This monopole antenna has a waterproof design, a high power handling capacity, and IP65 ingress protection rating. The PEANRBD1037 single-band antenna has a gain of 1 dBi for the 860 MHz to 870 MHz frequency range.

This 1 dBi gain omni directional antenna is one of the thousands of products available from Pasternack's in-stock inventory with same business day shipment for local, domestic, and international orders.
