

10 inches Edge Length, Trihedral Corner Reflector, Gray

PEWRL1000

Features

- 10" Edge Length
- Compact Size
- High RCS
- Rugged Configuration
- Painted Finish
- 10 to 100 GHz
- Tripod Mountable

Applications

- Radars
- Radar System Calibration
- Surveillance Equipment
- Radar Target Simulator
- Radar System Evaluation
- Test Chamber
- Communication Systems

Description

The Pasternack PEWRL1000 is a precision trihedral corner reflector tailored for stringent applications within antennas and radar systems. With a compact edge length of 10 inches, this reflector is meticulously engineered with a trihedral geometry to ensure optimal signal reflection and minimal signal loss. The trihedral corner reflector antenna simulates radar target precisely and is widely used for radar system calibration. Made from aluminum and coated with a robust gray powder coat finish, this corner reflector provides a professional appearance while protecting against environmental elements.

Internally, the reflector features a gold chemical film finish, to enhance conductivity and elevate overall performance. Adhering to rigorous industry standards, the 10 inches Edge Length PEWRL1000 from Pasternack guarantees reliability and exceptional signal reflectivity. These come standard with a 1/4-20 UNC threaded hole facilitates straightforward and secure mounting to a tripod, enabling versatile deployment across various testing and measurement scenarios. Whether utilized in research, development, or field applications, Pasternack's PEWRL1000 exemplifies precision engineering. Our trihedral corner reflectors are part of over 40,000 RF, microwave, and millimeter wave components from Pasternack available worldwide and ship same day.

Product Configuration

Design	Trihedral Corner Reflector
Body Material	Aluminum
Color	Gray
Reflector Surface	Gold chem film

Mechanical Specifications

Size	
Edge Length	10 in [254 mm]
Length	8.728 in [221.69 mm]
Width	4.287 in [108.89 mm]
Height	10 in [254 mm]
Weight	1.75 lbs [793.79 g]
